

I own a professional debt collection agency assisting healthcare, banking, utility and other business clients in recovering money from consumers that is past due. Without companies like ours the unpaid debt in our country would drive the prices up for those who do pay on time and would be devastating to our economy. Our Attorney General in Indiana is proposing changes to our States telemarketing no call list that could put limits on call from third party debt collectors. CAN YOU HELP US DO WHAT IS RIGHT. I do not want our state creating privacy programs that will hurt our economy and allow people to go on without paying what is due and owing and not worry about getting a call. Please let me know what I can do or what you can do to assist. Thanks for your consideration and time
